Pocketcomm™

INTRODUCTION

Barbara and Sidney Ander, both profoundly deaf, know firsthand the frustrations and barriers that separate the hearing-impaired people form the rest of society.

That's why the husband and wife team established COMPU-TTY, Inc. sixteen years ago. Headquartered in Texas, the company has grown from Barbara working at her kitchen table to the world's largest and leading DEAF OWNED TTY manufacturer, providing Krown TTYs all over the world.

"The days of playing catch-up to the hearing world are gone forever."
- Sidney Ander

The Americans with Disabilities Act
"A public accommodation shall take those steps that may be necessary to ensure that no individual with a disability is excluded, denied services, segregated or otherwise treated differently than other individuals..."
Title III, Department or Justice, Federal Register, July 26, 1991, Section 36.303 (a) Auxiliary aids and services

The American with Disabilities Act (ADA) requires that many public facilities, including hotels, hospitals, emergency services, transportation facilities, schools, and shopping malls, have TTYs* available for public access

*TTY, TDD, and Text Telephone all refer to the same device.

TABLE OF CONTENTS

Our Mission

Our Mission is to improve the quality of life for people who are deaf and hard of hearing by providing excellent telecommunication equipment for individuals, businesses, and professionals in any place including the home, work place, and in all public facilities.

Who are we?

We are the world's largest and leading DEAF-OWNED manufacturer of telecommunications devices for the deaf (TDD) and assistive devices.

COMPU-TTY, Inc. has earned an excellent reputation for providing consumers, corporations, health care centers, governments, hotels, schools, universities and many other organizations with outstanding value and service.

At COMPU-TTY, we
• Sell
• Repair
• Train
• Provide toll-free ordering and a support department
• Includes a first rate warranty

Pocket Speak and Read VCO®

$249.99

For the first time ever, use any phone, anywhere!

The greatest invention since the phone itself!

The biggest news in communications is actually the smallest

The PVCO comes with its own carrying case which features a belt clip for easy carrying and pockets to store two back-up batteries and the user manual

EASILY ATTACHES TO:

• Select Cell Phones	• Home Phones	• Business Phones
• Cordless Phones	• Pay Phones	• Emergency Call Box.

How to use a PVCO®

VCO means "Voice Carry Over." The pocket speak and read is specially designed for the deaf and hard-of-hearing who has a good speech ability and want to use their voice when making a relay call. How does relay work? Dial your state relay number (if there is a number for the VCO caller, use this number). Tell the agent the phone number you want to call. The agent will notify you when the hearing person answers. Go ahead and speak to the mouthpiece. The hearing person will hear your voice directly. When they respond to you, the agent will type what they say to you. The relay service is free of charge and 100% confidential. If you have any difficulty understanding a conversation for various reasons, you can request translation during the call.

When using a cell phone

The Cellular phones use high frequencies to carry the coded voice signals over the air. These carriers always cause noises to every receiver such as a radio, television, etc... especially when you dial out, or while riding in a car. What you would do to reduce the feedback noise, is to touch firmly against the antenna to make a better receiving signal. To be sure the feedback is gone, watch the LED on the left side of the PVCO®, after dialing a number the LED should be off. Surprisingly, you may use a piece of foil to wrap around the antenna. It is the same way you make better receiving signals for your TV. Sometimes a call can fade out (or be dropped) when being in between two cell tower areas. Don't panic... simply ask the operator to repeat what they typed to you.

1 Put the PVCO® on the earpiece and dial the relay number. If you have a VCO relay number, use this number.

2 If you use a VCO number, skip this step. After relay responds to you, move the PVCO® to the mouthpiece and press the right button

3 Move the PVCO® back to the earpiece and speak the number that you want to call to the relay operator.

4 If you use the machine in a dark area, you can turn on the back light by pressing the left button.

Tell relay the number that you want to call.

Relay types back to you what they hear.

You speak directly to the person you are calling

The caller answers to the relay operator.

Public Phone TTY $599.00

With Large Visual Display

Public Phone TTY is a TTY/TDD which has been specially designed to work with any public telephone. TTYs are device that people who are deaf, hard-of-hearing, or speech impaired use to make telephone calls.

Public Phone TTYs meet a high demand.
Installing this device in your facility will give your many visitors who are deaf or hard of hearing access to the telephone.
Efforts that began years ago with the installation of wheelchair ramps for access to public buildings now continue with the installation of Public Phone TTYs for access to public pay telephones. For the first time, people who use TTYs can have direct, reliable access to public telephones, a necessity that the hearing population takes for granted. Public Phone TTYs have been installed and are now working in airports, government building, police stations, hospitals, schools, shopping malls, apartment building, bus and train terminals, any place where there are public phones and people are aware of this available technology.

Features:
- Large Visual Display
- Direct connection to pay phone
- Works with almost all types of public telephones and popular enclosures.
- Does not affect the use of the telephone for the hearing users
- Approved by the FCC - has also been accepted by several major telephone equipment providers
- Designed for easy installation
- Made with vandal proof steel construction
- Sealed keyboard to resist spilled liquids
- One-Year Warranty

OPTIONAL:
- This Cabinet features a flap stay shelf and may be installed as an option for Public Phone TTY/TDD.
$250.00

RINGMAX® Amplified Phone Ringer $54.95
Model TEL 008

Have you been missing important phone calls? You don't have to anymore. If you have difficulty hearing the phone ring, the RINGMAX can help. The RINGMAX is an amplified phone ringer that lets you customize your phone ring for better hearing.

Set it to your Preferences With the RINGMAX, you can quickly and easily increase the volume, then set the tone and "warble" to a pitch that's best for you. Four specially selected tone settings emphasize those frequencies easiest to hear.

Multiple Phone Situations The RINGMAX can also be used with multiple phones. In these situations, its pleasant, electronic ring can be customized for different phones to let you know which one is ringing. In addition to these capabilities, RINGMAX features clean, European styling that's attractive and functional. Simply connect the RINGMAX to your existing phone jack with the supplied Y-connector, then mount it on the wall or table top. Total output is 95 dB SPL at 1 meter, included are 4-AA batteries, a wall mount, a Y-connector, and a phone cord. *One Year Warranty.* Applications: Personal use for those with mild-moderate hearing loss • Shop areas, garages, or other noisy environments • Multi-phone offices for distinctive rings.

Model TR 55 $42.95

The lamp plugged into the TR 55 can only be used for signaling. It also transmits to any receiver (SA101, SA201, & SB1000) throughout the house. This model is best used in rooms that will use a separate lamp for normal lighting.

Model TR 75 $49.95

SonicAlert's top of the line telephone ring signaler. The TR 75 flashes the light plugged into its own outlet and also sends a signal to remote receivers to flash lights in other rooms. The TR 75 also has a switch that allows the lamp to be used for signaling as well as normal lighting. The light will flash for the telephone ring even if the lamp is turned on!

Omni Page Receiver $199.95

The Omni Page Receiver is designed for people who need to communicate to another person or need to be aware of a single signal sent form one of the Silent Call Transmitters. The device system is completely wireless and has a range of up to 100 feet. Operates on 1-9V rechargeable Varta or Goldpeak battery (included).

Any one of the following transmitters can be used with the Omni Page Receiver:

- *Doorbell Transmitter*
- *Smoke Detector with transmitter*
- *Personal Pager*
- *Fire Alarm Transmitter*
- *Telephone Transmitter*
- *Sound Monitor with transmitter*
- *Door/Window Access Transmitter*

Triple S Alarm Clock and Bed Vibrator $59.95
Model ACBS-101

Alarm Clock with Bed Shaker Awake without disturbing anyone! It comes with four alarm functions. Variable adjustments for display brightness and vibration alert.

- *Bedshaker with 6 feet cable*
- *Loud audible alarm*
- *Vibrator test button*
- *Adjustable display brightness control*
- *Adjustable volume and tone controls*
- *Powered by an enclosed 9V AC adapter*

- *Jumbo size display*
- *Fast strobe alarm*
- *One touch alarm off button*
- *9V battery backup*
- *Approved thermo fuse in shaker*

Sonic Boom™ Alarm Clock $49.95
Model SB1000

This *Sonic Boom* Alarm Clock is a unique new clock that is guaranteed to wake up even the heaviest sleepers. When the alarm goes off, the user can select to wake up to any combination of loud pulsating audio alarm, flashing lights, or shaking bed (vibrator sold separately). The vibrator can produce a steady or pulsating vibration pattern for maximum effectiveness. Our patented adjustable volume and tone controls allows you to select the best sound combination to wake you up. The clock display also has an adjustable viewing angle with large, bright green LED numbers for easy viewing. It also has a battery back up for power outage (9v battery not included).

Both Super Shaker Bed Vibrator are placed under a pillow or between a mattress and box springs. The powerful vibrations are guaranteed to wake up extremely heavy sleepers. A built-in temperature sensor protects the unit against overheating.

Super Shaker Bed Vibrator $39.95
Model SS120V

The Super Shaker SS 120V is designed to be plugged into the electrical outlet on any of the Sonic Alert signalers or remote receivers. The SS 120V uses a UL listed transformer to reduce the 120 volt output of the Sonic Alert signalers to a safe 12 volts that is used in the vibrator.

Bed Vibrator $29.95
Model SS12V

The Super Shaker SS 12V Bed Vibrator is designed to be plugged into the vibrator outlet on the back of the Sonic Boom™ Alarm Clock.

AlertMaster AM-6000 — $179.95

The AlertMaster system uses flashing lamps, a bed shaker and a vibrating pager to announce household activities such as a ringing telephone, alarm clock, doorbell, audio alarms, baby cries, or motion detection. Various accessories allow you to customize the system to meet your needs Distinct flashing patterns to identify each activity

AM-6000 includes:
• Wireless doorbell
• Powerful bed shaker for night time notification
• "Snooze" feature on alarm clock
• Paging feature
• Battery back up (battery not included)
• No wiring required: just plug it in
• *One year warranty*

Access 3™ — $99.95

Alarm Clock come with adjustable volume (Loud to Off) and selectable tone (High to Low), give the sound you want or need. Be alerted to telephone ring by simply plugging in your phone to the built-in Rj11 jack (cord provided). To shake you awake, the telephone ring or door knock, connect a 12 volt bedshaker accessory to the vibrator jack (not included). Bright Halogen reading lamp flashes to alert you... For alarm clock, telephone ring or door knock. Wire a remote signal that goes to the built-in dry contact. Built-in wireless door announcer with selectable frequencies, works with door beacon transmitter or push button transmitter for a range of up to 75 feet.

DOOR SIGNALERS/SMOKE DETECTORS

Compu-TTY Door Knock Signaler — $29.95

Light flashes when someone knocks at the door. Great for privacy and portable use. It can be used in one room apt., dorm, office, hotel...anywhere - great for travel.
• *Easily hung over the top of any door (bracket included)*
• *Battery operated (9V battery is included)*
• *Battery Low Indicator*

Deluxe Model DS 700 — $59.95

Sonic Alert's wired doorbell signalers are also packed with features, but require simple wiring to work. They can be installed in a home with or without an existing doorbell system and both come with a doorbell button for homes without a doorbell system. The DS 700 flashes the light plugged into its own outlet and also sends a signal to remote receivers to flash lights in other rooms.

Gentex 710LS — $149.00

• 120,000 candela-seconds rating
• Nominal 2.5% sensitivity
• Full function test switch
• Mounting hardware for wall mount
• Solid state 90 dB horn
• Quadra-port smoke entry
• Fully insect screened

Hotel ADA

The Americans with Disabilities Act (ADA) requires all hotels and motels to make their facilities equally accessible to those with physical disabilities. For Hearing impaired guests, hotels and motels are required to provide rooms equipped with notification devices, telephone amplifiers and TDDs (Telecommunication Devices for the Deaf). Part of the cost of meeting these requirements may be tax deductible, or you may qualify to receive a tax credit for the installation. Your local hotel/motel association may also provide you with more information.

Number of rooms	Accessible rooms
1 to 25	1
26 to 50	2
51 to 75	3
76 to 100	4
101 to 150	5
151 to 200	6
201 to 300	7
301 to 400	8
401 to 500	9
501 to 1,000	2% of total
1001 and over	20 plus 1 for each 100 over 1,000

TDD with Printer for Front Desk
Telecommunication Device for the Deaf that prints a record of conversations. Allow easy communication between the front desk and the guest.

Public Pay Phone
This low profile TDD may be mounted on an existing public telephone shelf. This unit has a 16 character large visual display for guests who also has visual impairments as well as hearing impairments. The unit is activated by pressing any key on the keyboard. The public phones use by hearing callers is not affected.

Hospital ADA

Current estimates indicate there are over 28 million deaf, hearing and/or speech impaired people in the United States. Hospitals are among the public facilities who are required by the ADA to make all reasonable accommodations to meet the special needs of disabled Americans and to provide equal access to all facilities and services accordingly.

We at Compu-TTY are dedicated to supplying assistive devices for the hearing and speech impaired. We offer very reliable products, a complete on-site service center and years of experience in supporting the medical industry. Compu-TTY provides you with a single source of supply for all your ADA compliance needs.
