Pros: - contagious passion for computers
 - genuine care for his students
 - role model
 - epitome of great prof
 Cons: - Intimidating to approach

Dr. Arribi explains difficult
 concepts in an easy to
 understand way. Very good instructor.

I love this course. Shawki is one
 of the best profs I've ever had.

I thoroughly enjoyed the lectures, however I'd like
 the labs better if we didn't receive paper instructions
 3 days before the lab report was due.

• Recommended having in lab VHDL Test
 • Final Exam should be worth less
 • Professor taught material excellently

Please make lectures more interesting. Also, don't pick people to answer, that makes us want to skip because of fear.

WRITE-IN AREA 2

Also, I thought we aren't learning assembly.

Overall I really enjoyed the course, my only complaint is that the block on red text was hard to read. Also in the labs I think that there should be a little bit of time dedicated to explaining some of the features of ISIM
